

SAMSON GIDEY

Full Stack MERN Developer

Addis Ababa, Ethiopia | samsongidey9@gmail.com | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack MERN developer with hands-on experience building scalable, responsive web applications using React, Node.js, Express, and MongoDB. Skilled in designing RESTful APIs, implementing authentication systems, and managing application state with Redux Toolkit and Context API. Delivered a range of real-world projects spanning e-commerce platforms, admin dashboards, and corporate/marketing websites for clients. Continuously expanding expertise in backend architecture and AI integration.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Vite

Backend: Node.js, Express.js, RESTful API design

Database: MongoDB, Mongoose

Tools & Platforms: Git, GitHub, Postman, Netlify, Vercel

Additional: JWT Authentication, Third-Party API Integration, Data Visualization (Recharts), Responsive Design, Basic AI Tools

PROJECTS

Internship Admin Dashboard — Applicant Management System | *React, Vite, Tailwind CSS, shadcn/ui, React Router, Axios, Recharts*

- Built a frontend challenge project for an internship application: an admin dashboard enabling hiring administrators to manage internship applicants end-to-end against a real REST API.
- Implemented token-based login/logout with auto-expiring sessions and a centralized Axios layer that attaches auth tokens and redirects on session expiry.
- Developed a paginated, searchable, filterable, and sortable applicant table, full applicant detail views with status updates and internal notes, and a stats dashboard with status/track breakdown charts.
- Designed a fully responsive layout with a collapsible sidebar and mobile drawer navigation, plus loading, empty, error, and expired-session states throughout.

Bakery Full-Stack E-Commerce App | *MERN Stack, JWT, Redux Toolkit*

- Developed a full-stack e-commerce web application with secure JWT-based authentication and authorization.
- Built an admin dashboard for product and user management, backed by a responsive UI using modern React architecture and Redux Toolkit for global state.

[Live Demo](#) | [GitHub](#)

Gefrem Engineering — Corporate Website | *React, Tailwind CSS, React Router, Vite*

- Developed a modern, responsive marketing website for a geotechnical and construction engineering consultancy, including full brand identity (colors, typography, tagline).
- Built a professional hero section, services showcase, company overview, project portfolio gallery, and contact/inquiry section optimized for mobile.

[Live Demo](#)

Bokra Construction — Corporate Website | *React, JavaScript, Tailwind CSS, React Router, Vite*

- Built a modern, responsive corporate website to showcase construction services, completed projects, and industry expertise.
- Designed hero and company introduction sections, a services showcase, project portfolio/gallery, an About Us section, and contact/inquiry forms with smooth, mobile-optimized navigation.

Mobile Phone Shop — Product & Admin Management System | *React, Tailwind CSS, Node.js, Express, MongoDB*

- Built a public-facing product showcase for new and used mobile devices and accessories, with filtering by brand, condition, and storage.
- Implemented an admin-only management interface to add, edit, and delete products, with a clean separation between admin and customer views.

CBE Receipt Verifier | *React, Tailwind CSS, Vite*

- Built a lightweight tool that automates Commercial Bank of Ethiopia (CBE) receipt verification, instantly constructing verification URLs from an FT number and account digits.

- Designed a keyboard-first UX with live, color-coded URL preview, one-click verification, and clipboard copy, used broadly across Ethiopia.

[Live Demo](#)

Foodie Delight | *React, Vite, Tailwind CSS, Context API*

- Created a dynamic food browsing and ordering web application with routing and state management using React.
- Designed a responsive, user-friendly UI for browsing and discovering recipes.

ADDITIONAL INFORMATION

- Strong problem-solving and debugging skills, including diagnosing and resolving production database connectivity issues.
- Experience working independently across the full stack, from client-facing design through backend architecture.
- Passionate about learning backend systems and AI technologies.
